The following information was requested on 28 February 2024:

1. Reference: Tab: NHSR – 10 in the "Supplementary-Annual-Statistics-2022-23-3.xls" file found here: https://resolution.nhs.uk/resources/annual-statistics-including-factsheet-5/
The tables on this tab contain average damages values for settled claims by specialty.
For each scheme, for the Obstetrics CP/BD category, can you please provide the average damages values separately for claims settled as a) PPOs and b) lump sums for each settlement year?
In addition, for the Obstetrics CP/BD category, can you please provide the corresponding number of settled claims separately for claims settled as a) PPOs and b) lump sums for each settlement year?

2. Reference: Tab: NHSR – 1 in the "Supplementary-Annual-Statistics-2022-23-3.xls" file found here: https://resolution.nhs.uk/resources/annual-statistics-including-factsheet-5/
The tables on this tab contain payment totals split by damages values bands.
For each scheme, can you please provide the payment totals split by damages values bands by payment year separately for claims settled as a) PPOs and b) lump sums?

Our Response

Please find attached the requested information we are able to provide. This information only covers England and not the rest of the UK.

Please note: We have recently changed the way we report on our FOIs to align better with our published documents. Streamlining our reporting on FOIs with our annual published reports may mean a variation in snapshot dates. This means this data may not align with previous similar requests and it may not be possible for you to compare this information with a previous request. For further information, please refer to https://resolution.nhs.uk/resources/understanding-nhs-resolution-data.

Claims notified/received in any given year will often relate to incidents that have occurred many years prior. Due to the nature of clinical negligence claims and the level of investigation needed to bring them to a resolution, claims received and notified in a specific year may take years to settle and close. They are not guaranteed to be settled and closed in the same year. As such, there will be a time gap between incident and claim closure.

The data shows variation in the average claimant costs and average damages paid per year. This is a reflection of the nature of individual claims received and resolved by NHS Resolution, which can vary significantly. As such, these fluctuations cannot be interpreted as trends.

For an explanation of the schemes referred to please visit our webpage here: Clinical schemes - NHS Resolution

Table 1 shows: - Number and Average Damages of Clinical Claims Settled, between financial years 2006/07 and 2022/23 with a damages payment, where the Specialty is '**Obstetrics**' and claims are identified as 'CP/BD'. Breakdown by Year of Settlement, Scheme and Settlement Type.

Table 2 shows: - Payment Totals (damages, Claimant legal costs and NHS Legal Costs) of Clinical Claims, between financial years 2006/07 and 2022/23. Breakdown by Payment Year, Scheme, Damages Value Band and Settlement Type.

PPOs

PPOs are an agreement between the parties, to pay an initial lump sum and regular future payments (PPO damages) related to the injured party's ongoing needs, usually care for life i.e., a percentage of the full value of the claim is paid at the point of settlement (lump sum damages) with the balance paid at regular intervals over subsequent years. The information disclosed includes lump sum damages, costs and any PPO damages paid out in each of the relevant financial years.

Low figures

We have not provided the information for low figures involved, as we believe that disclosure of information with this level of granularity is exempt under Section 40(2) by virtue of section 40(3A)(a) of the FOI Act, where disclosure to a member of the public would contravene one or more of the data protection principles. The data protection principles are set out in Article 5 of the General Data Protection Regulation. We take the view that it would not be fair or lawful (given the sensitive and confidential nature of the information held) to disclose such information and any disclosure would therefore contravene the first data protection principle.

In some instances, the low numbers of claims (fewer than 5) in each category, the likelihood exists that individuals who are the subject of this information may be identified either from this information alone, or in combination with other available information. In addition to this, as this information is considered to be sensitive personal data (the data subjects' medical condition); NHS Resolution believes it has a greater responsibility to protect those individuals' identities, as disclosure could potentially cause damage and/or distress to those involved.

Further to our obligations to provide advice and assistance, you may find it helpful to review the work of the Getting It Right First Time team with whom NHS Resolution has been working with to undertake in-depth analysis of our claims data. They have produced a number of reports from analysing our claims data which has been shared following approval of the confidentiality advisory group to the use of confidential patient information for this purpose.

If you would like to know how data is categorised in our Claims database please see the following link: Glossary
