May 2024

FOI_6519

The following information was requested on 29th April 2024 and clarified on 6 May 2024:

Follow up to – FOI_6510 [FOI 6510 Missed-diagnosis-of-Subarachnoid-haemorrhage final.pdf \(resolution.nhs.uk\)](#)

Thank you for the response.

I would appreciate the following clarifications please:

- 1. Can the deep dive of the information be done if the SBNS paid the fee for the work required? If so, please indicate the cost.*
- 2. The CMS codes relevant to my enquiry are: 14, 17, 35, 39,40, 41, 43, 52, 87 and 91. Will this help to obtain the information I am seeking?*

[We replied on 30 April 2024]

Thank you for your email.

Regarding your clarification:

- 1. Unfortunately, we do not have the capacity to carry out the deep dive.*
- 2. Please, could you confirm which codes you are referring to? There are three tabs in the CNST codes [spreadsheet](#) – Cause, Injury and Specialty. Please, can you confirm which codes the numbers you listed refer to?*
- 3. Please, could you clarify the time frame you are interested in. We can provide the data in Financial years. Would you want the data for the last 4 FY (the most recent year being 2022/23. The data for 2023/24 should be available from August, on request).*

[You replied on 6 May 2024]

I am greatly appreciative for your reply. My responses are below for your kind consideration.

- 1. I am happy to work with any information you can provide please.*
- 2. The numbers I sent you earlier are from the Causes section of the spreadsheet. The numbers from the Injury section are 10, 18, 106 and 115. The numbers from the Specialty section are 15, 19, 20 and 35. A ruptured brain aneurysm causes a brain haemorrhage called subarachnoid haemorrhage which is a type of stroke. These patients initially present to Emergency departments or the GP. The diagnosis is usually confirmed by a CT Brain scan. If the diagnosis is missed the patient can come to harm because of a second haemorrhage which is much more serious. The harm can be death or severe permanent neurological disability. The numbers I have indicated cover the different clinical scenarios where the harm is recorded.*

3. *I am interested in the figures for the years 2020/21, 2021/22, 2022/23 and 2023/24 when available in August please.*

Our Response

Thank you for your request for information. Please find attached the requested information. Please note we only hold information for England. The data for the financial year 2023/24 is currently unavailable and will be available on request from August 2024.

Please note: Our claims management system does not have a code for Subarachnoid Haemorrhage and as such the injury codes that you have requested may not relate to Subarachnoid Haemorrhage and may relate to other conditions or injuries.

Please note: We have recently changed the way we report on our FOIs to align better with our published documents. Streamlining our reporting on FOIs with our annual published reports may mean a variation in snapshot dates. This means this data may not align with previous similar requests and it may not be possible for you to compare this information with a previous request. For further information, please refer to <https://resolution.nhs.uk/resources/understanding-nhs-resolution-data>.

Claims notified/received in any given year will often relate to incidents that have occurred many years prior. Due to the nature of negligence claims and the level of investigation needed to bring them to a resolution, claims received and notified in a specific year may take years to settle and close. They are not guaranteed to be settled and closed in the same year. As such, there will be a time gap between incident and claim closure.

Due to the way in which data is extracted, it is also possible that the same claim may appear more than once in a dataset, across different year groups e.g. where the case has been closed (as unsuccessful), challenged, reopened, and closed again at conclusion.

The data shows variation in numbers of cases received, closed per year and costs attributed to those claims. This is a reflection of the nature of individual claims received by NHS Resolution, which can vary significantly. In some cases, this can be affected by an adverse issue involving a number of patients. As such, these fluctuations cannot be interpreted as trends.

Please note, NHS Resolution started operating the state indemnity scheme for general practice in England in April 2019. The Clinical Negligence Scheme for General Practice (CNSGP) covers clinical negligence liabilities arising in general practice in relation to incidents that occurred on or after 1 April 2019.

On 6 April 2020, the Existing Liabilities Scheme for General Practice (ELSGP), was established to provide indemnity cover for NHS clinical negligence claims made against

current and former GP members of medical defence organisations (MDOs) in respect of liabilities incurred before 1 April 2019. This is where terms have been agreed with MDOs in relation to indemnity provision for their GP members under the ELSGP. There is a recognised time lag between incidents occurring and them being reported as claims so the increase in numbers from 20/21 to 22/23 is impacted by CNSGP (as would be expected for a maturing scheme) and ELSGP cases taken over from the MDOs. For more detail on this please see the [NHS Resolution – Annual report and accounts 2022/23](#).

Table 1 shows: - Number of Clinical Claims and Incidents received between financial years 2020/21 and 2022/23 where the Primary Specialty is either Emergency Medicine, General Medicine, General Practice or Neurosurgery, and the primary cause is either "Fail/Delay Treatment", "Fail To Act on Abnormal Test Result", "Fail/Delay Referring To Hosp.", "Failure To Interpret X-Ray", "Failure To Perform Operation", "Failure To Perform Tests", "Failure/Delay Diagnosis", "Inappropriate Discharge", "Unexpected Death" or "Wrong Diagnosis", and the Primary Injury is either Aneurysm, Brain Damage, Rupture or Stroke.

Table 2 shows: - Number and Cost of Clinical Claims Closed (or settled with a periodical payment order) between financial years 2020/21 and 2022/23 with a damages payment, where the Primary Specialty is either Emergency Medicine, General Medicine, General Practice or Neurosurgery, and the primary cause is either "Fail/Delay Treatment", "Fail To Act on Abnormal Test Result", "Fail/Delay Referring To Hosp.", "Failure To Interpret X-Ray", "Failure To Perform Operation", "Failure To Perform Tests", "Failure/Delay Diagnosis", "Inappropriate Discharge", "Unexpected Death" or "Wrong Diagnosis", and the Primary Injury is either Aneurysm, Brain Damage, Rupture or Stroke. The data includes the damages and legal costs paid up until the end of each relevant financial year of closure, or for PPO matters, year of settlement.

Table 3 shows: - Number and Cost of Clinical Claims Closed between financial years 2020/21 and 2022/23 with **NIL** damages paid where the Primary Specialty is either Emergency Medicine, General Medicine, General Practice or Neurosurgery, and the primary cause is either "Fail/Delay Treatment", "Fail To Act on Abnormal Test Result", "Fail/Delay Referring To Hosp.", "Failure To Interpret X-Ray", "Failure To Perform Operation", "Failure To Perform Tests", "Failure/Delay Diagnosis", "Inappropriate Discharge", "Unexpected Death" or "Wrong Diagnosis", and the Primary Injury is either Aneurysm, Brain Damage, Rupture or Stroke.

Table 4 shows: - Analysis of Specialities of Clinical Claims Closed with a damages payment (or settled with a periodical payment order) between financial years 2020/21 and 2022/23, where the Primary Specialty is either Emergency Medicine, General Medicine, General Practice or Neurosurgery, and the primary cause is either "Fail/Delay Treatment", "Fail To Act on Abnormal Test Result", "Fail/Delay Referring To Hosp.", "Failure To Interpret X-Ray", "Failure To Perform Operation", "Failure To Perform Tests", "Failure/Delay Diagnosis", "Inappropriate Discharge", "Unexpected Death" or "Wrong Diagnosis", and the Primary Injury is either Aneurysm, Brain Damage, Rupture or

Stroke. The data includes the damages and legal costs paid up until the end of each relevant financial year of closure, or for PPO matters, year of settlement.

Table 5 shows: - Analysis of Primary Injuries of Clinical Claims Closed with a damages payment (or settled with a periodical payment order) between financial years 2020/21 and 2022/23, where the Primary Specialty is either Emergency Medicine, General Medicine, General Practice or Neurosurgery, and the primary cause is either "Fail/Delay Treatment", "Fail To Act on Abnormal Test Result", "Fail/Delay Referring To Hosp.", "Failure To Interpret X-Ray", "Failure To Perform Operation", "Failure To Perform Tests", "Failure/Delay Diagnosis", "Inappropriate Discharge", "Unexpected Death" or "Wrong Diagnosis", and the Primary Injury is either Aneurysm, Brain Damage, Rupture or Stroke. The data includes the damages and legal costs paid up until the end of each relevant financial year of closure, or for PPO matters, year of settlement.

Table 6 shows: - Analysis of Primary Causes of Clinical Claims Closed with a damages payment (or settled with a periodical payment order) between financial years 2020/21 and 2022/23, where the Primary Specialty is either Emergency Medicine, General Medicine, General Practice or Neurosurgery, and the primary cause is either "Fail/Delay Treatment", "Fail To Act on Abnormal Test Result", "Fail/Delay Referring To Hosp.", "Failure To Interpret X-Ray", "Failure To Perform Operation", "Failure To Perform Tests", "Failure/Delay Diagnosis", "Inappropriate Discharge", "Unexpected Death" or "Wrong Diagnosis", and the Primary Injury is either Aneurysm, Brain Damage, Rupture or Stroke. The data includes the damages and legal costs paid up until the end of each relevant financial year of closure, or for PPO matters, year of settlement.

PPOs

The information disclosed includes damages and costs paid up to the end of the settlement year (in Periodical payment order (PPO) cases) and up to the end of the closure year in non-PPO cases.

PPOs are an agreement between the parties, to pay an initial lump sum and regular future payments (PPO damages) related to the injured party's ongoing needs, usually care for life i.e., a percentage of the full value of the claim is paid at the point of settlement (lump sum damages) with the balance paid at regular intervals over subsequent years. The information disclosed includes lump sum damages, costs and any PPO damages paid up to the end of the year of settlement. It does not include PPO damages, which have been committed to but due to be paid after the settlement year.

Low Numbers

We have suppressed low figures as we believe that disclosure of information with this level of granularity is exempt under Section 40(2) by virtue of section 40(3A)(a) of the

FOI Act, where disclosure to a member of the public would contravene one or more of the data protection principles. The data protection principles are set out in Article 5 of the General Data Protection Regulation. We take the view that it would not be fair or lawful (given the sensitive and confidential nature of the information held) to disclose such information, and any disclosure would therefore contravene the first data protection principle.

In some instances, the low numbers of claims (fewer than 5) in each category, the likelihood exists that individuals who are the subject of this information may be identified either from this information alone, or in combination with other available information. In addition to this, as this information is considered to be sensitive personal data (the data subjects' medical condition); NHS Resolution believes it has a greater responsibility to protect those individuals' identities, as disclosure could potentially cause damage and/or distress to those involved. Where we are in the territory of such small numbers in the attached, we have used a '#' symbol in the relevant field. You should still be able to see aggregate/total details for higher level fields containing this data.

Further to our obligations to provide advice and assistance, you may find it helpful to review the work of the [Getting It Right First Time team](#) with whom NHS Resolution has been working with to undertake in-depth analysis of our claims data. They have produced a number of [reports](#) from analysing our claims data, which has been shared following approval of the confidentiality advisory group to the use of confidential patient information for this purpose.

If you would like to know how data is categorised in our Claims database please see the following link: [Glossary](#)

This concludes our response to your request.

If you are not satisfied with the service that you have received in response to your information request, it is open to you to make a complaint and request a formal review of our decisions. If you choose to do this, you should write to [Tinku Mitra](#), Deputy Director of Corporate and Information Governance, Data Protection Officer for NHS Resolution, within 28 days of your receipt of this reply. Reviews of decisions made in relation to information requests are carried out by a person who was not involved in the original decision-making about the request.

If you are not content with the outcome of your complaint, you may apply directly to the Information Commissioner for a review of the decision. Generally, the Information Commissioner will not make a decision unless you have exhausted the local complaints procedure. The address of the Information Commissioner's Office is:

Wycliffe House
Water Lane
Wilmslow
Cheshire
