

Resolution

8th Floor,
10 South Colonnade
Canary Wharf
London
E14 4PU
Telephone: 020 7811 2700

August 2024
FOI_6682

The following information was requested on 26th July 2024 and clarified on 31 July 2024:

[You requested the following on 26 July 2024]:

I am writing to request information under the Freedom of Information Act, please can you provide the following:

- 1. Number of claims made for 'failure/delay in diagnosis' and/or 'wrong diagnosis' for FLT3-ITD mutations for the following years and by NHS trust 2019 to 2023*
- 2. Value of claims successfully closed or settled where the Primary Cause is failure/delay in diagnosis or wrong diagnosis.*

[We replied on 29 July 2024 with]:

Thank you for your request.

Please refer to our publication: [Guidance-note-Understanding-NHS-Resolution-data-updated](#) and a set of codes against which claims are logged: [CNST-Codes.xlsx \(live.com\)](#) (see the three tabs for specialty, injury and cause in the spreadsheet).

*I would like to advise that we do **not** have a code for FLT3-ITD mutation.*

We are able to provide information about all claims with cause codes failure/delay diagnosis and wrong diagnosis or for those causes in the specialty haematology and/or oncology.

Please, could you confirm if the above options would be useful for you?

Your request will be put on hold until we receive the clarification requested above.

[You replied on 29 July 2024 with]:

Thank you so much for coming back to me, this is really helpful, thank you.

Is it possible to identify from this information patients who are hemato-oncology? I assume these individuals are covered by haematology. But the "Failure/Delay Diagnosis" code would be appropriate for my information request.

Thank you so much for your help.

[On 31 July 2024 we replied with]:

Good afternoon,

I have checked with my colleagues, and they confirm we can only pull the information separately for Haematology and Oncology, not conjoined. Data for both specialties would be broken down by trust and cause.

Would you be interested in data for both these specialties?

[You replied on 31 July 2024 with]:

This would be really helpful. Thank you.

Our Response

Thank you for your request for information. Please find attached the requested information. Please note we only hold information for England.

Please note: We have recently changed the way we report on our FOIs to align better with our published documents. Streamlining our reporting on FOIs with our annual published reports may mean a variation in snapshot dates. This means this data may not align with previous similar requests and it may not be possible for you to compare this information with a previous request. For further information, please refer to <https://resolution.nhs.uk/resources/understanding-nhs-resolution-data>.

Claims notified/received in any given year will often relate to incidents that have occurred many years prior. Due to the nature of negligence claims and the level of investigation needed to bring them to a resolution, claims received and notified in a specific year may take years to settle and close. They are not guaranteed to be settled and closed in the same year. As such, there will be a time gap between incident and claim closure.

Due to the way in which data is extracted, it is also possible that the same claim may appear more than once in a dataset, across different year groups e.g. where the case has been closed (as unsuccessful), challenged, reopened, and closed again at conclusion.

The data shows variation in numbers of cases received, closed per year and costs attributed to those claims. This is a reflection of the nature of individual claims received by NHS Resolution, which can vary significantly. In some cases, this can be affected by an adverse issue involving a number of patients. As such, these fluctuations cannot be interpreted as trends.

Please note: these tables should not be interpreted as a league table. Larger member organisations and those which provide more complex treatments may receive more

claims than smaller organisations or those providing low risk care. Inevitably, different institutions face different levels of risk because of the variations in the nature and complexity of the procedures they perform.

Table 1 shows: - Number of Clinical Claims and Incidents received between financial years '2018/19' and '2023/24' where the Specialty is '**Haematology**' and the Primary Cause is 'Failure/Delay in Diagnosis' or 'Wrong Diagnosis'. Broken down by Trust.

Table 2 shows: - Number of Clinical Claims and Incidents received between financial years '2018/19' and '2023/24' where the Specialty is '**Oncology**' and the Primary Cause is 'Failure/Delay in Diagnosis' or 'Wrong Diagnosis'. Broken down by Trust.

Table 3 shows: - Number and cost of Clinical Claims Closed (or settled with a periodical payment order) between financial years '2018/19' and '2023/24' with a damages payment, where the Specialty is '**Haematology**' and Primary Cause is 'Failure/Delay in Diagnosis' or 'Wrong Diagnosis'. The data includes the damages and legal costs paid up until the end of each relevant financial year of closure, or for PPO matters, year of settlement. Broken down by Trust.

Table 4 shows: - Number and cost of Clinical Claims Closed between financial years '2018/19' and '2023/24' with a damages payment, where the Specialty is '**Oncology**' and Primary Cause is 'Failure/Delay in Diagnosis' or 'Wrong Diagnosis'. The data includes the damages and legal costs paid up until the end of each relevant financial year of closure. Broken down by Trust.

The number and value of cases closed each year can vary due to the individual nature of claims. The value of cases closed for Bedfordshire Hospitals NHS FT in Table 4 is a result of a small number of higher value claims settling in the same time period and cannot be interpreted as a trend.

PPOs

The information disclosed includes damages and costs paid up to the end of the settlement year (in Periodical payment order (PPO) cases) and up to the end of the closure year in non-PPO cases.

PPOs are an agreement between the parties, to pay an initial lump sum and regular future payments (PPO damages) related to the injured party's ongoing needs, usually care for life i.e., a percentage of the full value of the claim is paid at the point of settlement (lump sum damages) with the balance paid at regular intervals over subsequent years. The information disclosed includes lump sum damages, costs and any PPO damages paid up to the end of the year of settlement. It does not include PPO damages, which have been committed to but due to be paid after the settlement year.

Low Numbers

We have suppressed low figures as we believe that disclosure of information with this level of granularity is exempt under Section 40(2) by virtue of section 40(3A)(a) of the FOI Act, where disclosure to a member of the public would contravene one or more of the data protection principles. The data protection principles are set out in Article 5 of the General Data Protection Regulation. We take the view that it would not be fair or lawful (given the sensitive and confidential nature of the information held) to disclose such information, and any disclosure would therefore contravene the first data protection principle.

In some instances, the low numbers of claims (fewer than 5) in each category, the likelihood exists that individuals who are the subject of this information may be identified either from this information alone, or in combination with other available information. In addition to this, as this information is considered to be sensitive personal data (the data subjects' medical condition); NHS Resolution believes it has a greater responsibility to protect those individuals' identities, as disclosure could potentially cause damage and/or distress to those involved. Where we are in the territory of such small numbers in the attached, we have used a '#' symbol in the relevant field. You should still be able to see aggregate/total details for higher level fields containing this data.

Further to our obligations to provide advice and assistance, you may find it helpful to review the work of the [Getting It Right First Time team](#) with whom NHS Resolution has been working with to undertake in-depth analysis of our claims data. They have produced a number of [reports](#) from analysing our claims data, which has been shared following approval of the confidentiality advisory group to the use of confidential patient information for this purpose.

If you would like to know how data is categorised in our Claims database please see the following link: [Glossary](#)

This concludes our response to your request.

If you are not satisfied with the service that you have received in response to your information request, it is open to you to make a complaint and request a formal review of our decisions. If you choose to do this, you should write to [Tinku Mitra](#), Deputy Director of Corporate and Information Governance, Data Protection Officer for NHS Resolution, within 28 days of your receipt of this reply. Reviews of decisions made in relation to information requests are carried out by a person who was not involved in the original decision-making about the request.

If you are not content with the outcome of your complaint, you may apply directly to the Information Commissioner for a review of the decision. Generally, the Information Commissioner will not make a decision unless you have exhausted the local complaints procedure. The address of the Information Commissioner's Office is:

Wycliffe House

Water Lane
Wilmslow
Cheshire
SK9 5AF

<https://ico.org.uk/>

TABLE OF CONTENTS

NB: Number of claims fewer than 5 (and any associated values, within the same row) are masked with a "#" (in accordance with Data Protection guidelines). Accordingly, some total values may also be approximated to prevent masked values to be deduced through reverse calculation.

Table 1: Number of Clinical Claims and Incidents received between financial years '2018/19' and '2023/24' where the Specialty is 'Haematology' and the Primary Cause is 'Failure/Delay in Diagnosis' or 'Wrong Diagnosis'. Broken down by Trust.

Table 2: Number of Clinical Claims and Incidents received between financial years '2018/19' and '2023/24' where the Specialty is 'Oncology' and the Primary Cause is 'Failure/Delay in Diagnosis' or 'Wrong Diagnosis'. Broken down by Trust.

Table 3: Number and cost of Clinical Claims Closed (or settled with a periodical payment order) between financial years '2018/19' and '2023/24' with a damages payment, where the Specialty is 'Haematology' and Primary Cause is 'Failure/Delay in Diagnosis' or 'Wrong Diagnosis'. The data includes the damages and legal costs paid up until the end of each relevant financial year of closure, or for PPO matters, year of settlement. Broken down by Trust.

Table 4: Number and cost of Clinical Claims Closed between financial years '2018/19' and '2023/24' with a damages payment, where the Specialty is 'Oncology' and Primary Cause is 'Failure/Delay in Diagnosis' or 'Wrong Diagnosis'. The data includes the damages and legal costs paid up until the end of each relevant financial year of closure. Broken down by Trust.

Table 1: Number of Clinical Claims and Incidents received between financial years '2018/19' and '2023/24' where the Specialty is 'Haematology' and the Primary Cause is 'Failure/Delay in Diagnosis' or 'Wrong Diagnosis'. Broken down by Trust.
