February 2025

FOI_7008

The following information was requested on 31 January 2025:

Under the Freedom of Information Act 2000, please can you disclose the following information:

- 1.
- 2.
3. *The number of claims against NHS Trusts for*
4. ***Failure/Delay Diagnosis***
5. ***and Wrong Diagnosis***
6. *in the last 5 years? Can this be broken down by year and by NHS Trust? Calendar*
- Years: 2020, 2021, 2022, 2023, 2024.*
- 7.
- 8.
- 9.
10. *The number of claims settled and the cost of claims against NHS Trusts for*
11. *Failure/Delay Diagnosis*
12. *and Wrong Diagnosis,*
13. *broken down by Trust and year. Calendar Years: 2020, 2021, 2022, 2023, 2024.*
- (Including No. of claims, Damages Paid, NHS Legal Costs paid, Claimant legal costs paid, Total*
- paid)*
- 14.
- 15.
- 16.
17. *Injuries that resulted from*
18. *Failure/Delay Diagnosis*
19. *and Wrong Diagnosis*
20. *in the last 5 years? Can this be broken down by year, type of injury and by NHS Trust?*
- Calendar Years: 2020, 2021, 2022, 2023, 2024.*
- 21.

You clarified on 31 January 2025

Apologies for the numbers. It seems to have been formatted incorrectly. The numbers can be ignored as the questions are still what I'm interested in.

Yes, if you could provide the figures for financial years 2019/20 - 2023/24 instead then that would be great thanks.

Our Response

Thank you for your request for information. Please find attached the requested information we are able to provide. Please note we only hold information for England.

We report in complete financial years. The data for the financial year 2024/25 is currently unavailable and will be available on request from August 2025.

Please note: We have recently changed the way we report on our FOIs to align better with our published documents. Streamlining our reporting on FOIs with our annual published reports may mean a variation in snapshot dates. This means this data may not align with previous similar requests and it may not be possible for you to compare this information with a previous request. For further information, please refer to <https://resolution.nhs.uk/resources/understanding-nhs-resolution-data>.

Claims notified/received in any given year will often relate to incidents that have occurred many years prior. Due to the nature of negligence claims and the level of investigation needed to bring them to a resolution, claims received and notified in a specific year may take years to settle and close. They are not guaranteed to be settled and closed in the same year. As such, there will be a time gap between incident and claim closure.

Due to the way in which data is extracted, it is also possible that the same claim may appear more than once in a dataset, across different year groups e.g. where the case has been closed (as unsuccessful), challenged, reopened, and closed again at conclusion.

The data shows variation in numbers of cases received, closed per year and costs attributed to those claims. This is a reflection of the nature of individual claims received by NHS Resolution, which can vary significantly. In some cases, this can be affected by an adverse issue involving a number of patients. As such, these fluctuations cannot be interpreted as trends.

For information about our Clinical Negligence Schemes, please visit our website here: [Clinical schemes - NHS Resolution](#)

Please note: Cover under the Clinical Negligence Scheme for Trusts (CNST) has also been available to independent sector providers (ISPs) of NHS care since 1st April 2013, but data relating to these ISPs has not been included in our response, as the request was for a breakdown by NHS Trust.

Please note: these tables should not be interpreted as a league table. Larger member organisations and those which provide more complex treatments may receive more claims than smaller organisations or those providing low risk care. Inevitably, different institutions face different levels of risk because of the variations in the nature and complexity of the procedures they perform.

Table 1 shows: - Number of CNST Claims and Incidents received between financial years '2019/20' and '2023/24' where the Primary Cause is 'Failure/Delay Diagnosis' or 'Wrong Diagnosis'. Broken down by Year and Trust.

Table 2 shows: - Number and Cost of CNST Claims Closed (or settled with a periodical payment order) between financial years '2019/20' and '2023/24' with a damages payment, where the Primary Cause is 'Failure/Delay Diagnosis' or 'Wrong Diagnosis'. The data includes the damages and legal costs paid up until the end of each relevant financial year of closure, or for PPO matters, year of settlement. Broken down by Year and Trust.

Table 3 shows: - Number and Cost of CNST Claims Closed between financial years '2019/20' and '2023/24' with **NIL** damages paid where the Primary Cause is 'Failure/Delay Diagnosis' or 'Wrong Diagnosis'. The data includes legal costs paid up until the end of each relevant financial year of closure. Broken down by Year and Trust.

Table 4 shows: - Analysis of Primary Injuries for CNST Claims Closed (or settled with a periodical payment order) with a damages payment between financial years '2019/20' and '2023/24' where the Primary Cause is 'Failure/Delay Diagnosis' or 'Wrong Diagnosis'. The data includes the damages and legal costs paid up until the end of each relevant financial year of closure, or for PPO matters, year of settlement. Broken down by Trust and Primary Injury.

PPOs

The information disclosed includes damages and costs paid up to the end of the settlement year (in Periodical payment order (PPO) cases) and up to the end of the closure year in non-PPO cases.

PPOs are an agreement between the parties, to pay an initial lump sum and regular future payments (PPO damages) related to the injured party's ongoing needs, usually care for life i.e., a percentage of the full value of the claim is paid at the point of settlement (lump sum damages) with the balance paid at regular intervals over subsequent years. The information disclosed includes lump sum damages, costs and any PPO damages paid up to the end of the year of settlement. It does not include PPO damages, which have been committed to but due to be paid after the settlement year.

Low Numbers

We have suppressed low figures as we believe that disclosure of information with this level of granularity is exempt under Section 40(2) by virtue of section 40(3A) (a) of the FOI Act, where disclosure to a member of the public would contravene one or more of the data protection principles. The data protection principles are set out in Article 5 of

the General Data Protection Regulation. We take the view that it would not be fair or lawful (given the sensitive and confidential nature of the information held) to disclose such information, and any disclosure would therefore contravene the first data protection principle.

In some instances, the low numbers of claims (fewer than 5) in each category, the likelihood exists that individuals who are the subject of this information may be identified either from this information alone, or in combination with other available information. In addition to this, as this information is considered to be sensitive personal data (the data subjects' medical condition); NHS Resolution believes it has a greater responsibility to protect those individuals' identities, as disclosure could potentially cause damage and/or distress to those involved. Where we are in the territory of such small numbers in the attached, we have used a '#' symbol in the relevant field. You should still be able to see aggregate/total details for higher level fields containing this data.

Further to our obligations to provide advice and assistance, you may find it helpful to review the work of the [Getting It Right First Time team](#) with whom NHS Resolution has been working with to undertake in-depth analysis of our claims data. They have produced a number of [reports](#) from analysing our claims data, which has been shared following approval of the confidentiality advisory group to the use of confidential patient information for this purpose.

If you would like to know how data is categorised in our Claims database please see the following link: [Glossary](#)

This concludes our response to your request.

If you are not satisfied with the service that you have received in response to your information request, it is open to you to make a complaint and request a formal review of our decisions. If you choose to do this, you should write to [Tinku Mitra](#), Deputy Director of Corporate and Information Governance, Data Protection Officer for NHS Resolution, within 28 days of your receipt of this reply. Reviews of decisions made in relation to information requests are carried out by a person who was not involved in the original decision-making about the request.

If you are not content with the outcome of your complaint, you may apply directly to the Information Commissioner for a review of the decision. Generally, the Information Commissioner will not make a decision unless you have exhausted the local complaints procedure. The address of the Information Commissioner's Office is:

Wycliffe House
Water Lane
Wilmslow
Cheshire
SK9 5AF
