June 2025
FOI_7236

The following information was requested on 28 May 2025:

*Under the Freedom of Information Act 2000, please can you disclose the following information:*

*1. The number of claims made by ambulance staff/paramedics for injuries sustained while on duty. (Broken down by financial years 2021/22, 2022/23, 2023/24)*
*1a) Broken down by Ambulance Trust (the number of claims made by staff per trust) (Broken down by same years as above).*
*1b) Broken down by primary injury and primary cause (Broken down by same years as above).*

*2. The amount paid out in compensation to successful claims. (Broken down by financial years 2021/22, 2022/23, 2023/24)*
*2a) The number of claims that were settled with compensation. (Broken down by same years as above).*
*2b) Broken down by Ambulance Trust (Broken down by same years as above).*

**Our Response**

Please note: we are able to provide information relating to Ambulance Trusts, but we do not record the type of employee.

Please find attached the requested information we are able to provide. This information only covers England and not the rest of the UK. We are able to provide the data on the claims and incidents notified to us.

**Please note:** We have recently changed the way we report on our FOIs to align better with our published documents. Streamlining our reporting on FOIs with our annual published reports may mean a variation in snapshot dates. This means this data may not align with previous similar requests and it may not be possible for you to compare this information with a previous request. For further information, please refer to [Understanding NHS Resolution data - NHS Resolution]

Please note claims notified/received and open are not guaranteed to be settled in the same year and can take many years to be concluded. Claims notified/received in any given year will often relate to incidents that have occurred many years prior. Due to the nature of negligence claims and the level of investigation needed to bring them to a resolution, claims received and notified in a specific year may take years to settle.

Due to the way in which data is extracted, it is also possible that the same claim may appear more than once in a dataset, across different year groups e.g. where the case has been closed (as nil damages payment), challenged, reopened, and closed again at conclusion.

The data shows variation in numbers of cases received, closed per year, and costs attributed to those claims. This is a reflection of the nature of individual claims received and resolved by NHS Resolution which can vary significantly. As such these fluctuations cannot be interpreted as trends.

**LTPS Scheme**

NHS Resolution manages a number of risk-pooling schemes for the NHS, one of which is the Liability to Third Parties Scheme (LTPS). This covers both employers' liability (**EL**) (i.e. in relation to duties of care owed to employees) and public liability (**PL**) (i.e. in relation to duties of care owed to patients, visitors, and other members of the public). You can find out more about the LTPS scheme here: [Liabilities to Third Parties Scheme - NHS Resolution]

**Please note: the tables broken down by Trusts should not be interpreted as a league table. Inevitably, different institutions face different levels of risk because of variations in the volume, nature and complexity of the work they perform.**

Please **find attached** the following tables**:**

**Table 1 shows:** – Number of Claims and Incidents received between financial years 2021/22 and 2023/24 for Ambulance Trusts where the liability type is 'Employers Liability'. Broken down by Year and Ambulance Trust.

Please note: Isle of Wight NHS Trust is not a specialist Ambulance Trust, but has been included as the Isle of Wight Ambulance Service is part of this Trust. As we do not record the type of employee, the claims recorded for this Trust in particular (and all other Trusts listed) may not relate specifically to paramedics/ambulance staff)

**Table 2 shows**: - Number of Claims and Incidents received between financial years 2021/22 and 2023/24 for Ambulance Trusts where the liability type is 'Employers Liability'. Broken down by Year and Primary Injury.

**Table 3 shows**: - Number of Claims and Incidents received between financial years 2021/22 and 2023/24 for Ambulance Trusts where the liability type is 'Employers Liability'. Broken down by Year and Primary Cause.

**Table 4 shows**: - Number and Cost of Claims Closed between financial years 2021/22 and 2023/24 with a damages payment, where the liability type is 'Employers Liability', for Ambulance Trusts. The data includes the damages and legal costs paid up until the end of each relevant financial year of closure. Broken down by Year and Ambulance Trust.

**Table 5 shows**: - Number and Cost of Claims Closed between financial years 2021/22 and 2023/24 with a damages payment, where the liability type is 'Employers Liability', for Ambulance Trusts. The data includes the damages and legal costs paid up until the end of each relevant financial year of closure. Broken down by Year and Primary Injury.

**Table 6 shows**: - Number and Cost of Claims Closed between financial years 2021/22 and 2023/24 with a damages payment, where the liability type is 'Employers Liability', for Ambulance Trusts. The data includes the damages and legal costs paid up until the end of each relevant financial year of closure. Broken down by Year and Primary Cause.

**Low Numbers -**

We have supressed low figures as we believe that disclosure of information with this level of granularity is exempt under Section 40(2) by virtue of section 40(3A) (a) of the FOI Act, where disclosure to a member of the public would contravene one or more of the data protection principles. The data protection principles are set out in Article 5 of the General Data Protection Regulation. We take the view that it would not be fair or lawful (given the sensitive and confidential nature of the information held) to disclose such information, and any disclosure would therefore contravene the first data protection principle.

In some instances, the low numbers of claims (fewer than 5) in each category, the likelihood exists that individuals who are the subject of this information may be identified either from this information alone, or in combination with other available information. In addition to this, as this information is considered to be sensitive personal data (the data subjects' medical condition); NHS Resolution believes it has a greater responsibility to protect those individuals' identities, as disclosure could potentially cause damage and/or distress to those involved. Where we are in the territory of such small numbers in the attached, we have used a '#' symbol in the relevant field. You should still be able to see aggregate/total details for higher level fields containing this data.

Please also visit our **Learning from workplace violence claims within the NHS: A thematic review - NHS Resolution** produced by NHS Resolution in collaboration with the Social Partnership Forum and NHS England.

Further to our obligations to provide advice and assistance, you may find it helpful to review the work of the Getting It Right First Time team with whom NHS Resolution has been working with to undertake in-depth analysis of our claims data. They have produced a number of reports from analysing our claims data, which has been shared following approval of the confidentiality advisory group to the use of confidential patient information for this purpose.

If you would like to know how data is categorised in our Claims database please see the following link: Glossary

**This concludes our response to your request.**

If you are not satisfied with the service that you have received in response to your information request, it is open to you to make a complaint and request a formal review of our decisions. If you choose to do this, you should write to Joanne Appleby, Deputy Data Protection Officer for NHS Resolution, within 28 days of your receipt of this reply. Reviews of decisions made in relation to information requests are carried out by a person who was not involved in the original decision-making about the request.

If you are not content with the outcome of your complaint, you may apply directly to the Information Commissioner for a review of the decision. Generally, the Information Commissioner will not make a decision unless you have exhausted the local complaints procedure. The address of the Information Commissioner's Office is:

Wycliffe House
Water Lane
Wilmslow
Cheshire
SK9 5AF

https://ico.org.uk/

**Freedom of Information Request# 7236**
**Data correct as at: The end of every financial year**

## TABLE OF CONTENTS

**NB: Number of claims fewer than 5 (and any associated values, within the same row) are masked with a "#" (in accordance with Data Protection guidelines). Accordingly, some total values may also be approximated to prevent masked values to be deduced through reverse calculation.**

**Freedom of Information Request# 7236**
**Data correct as at: The end of every financial year**

***Please note: the tables broken down by Trusts should not be interpreted as a league table. Larger member organisations and those which provide more complex treatments may receive more claims than smaller organisations or those providing low risk care. Inevitably, different institutions face different levels of risk because of the variations in the nature and complexity of the procedures they perform. In some circumstances, volumes of reported cases may be impacted by multiple claims notified in relation to one cause of action.***
