November 2025
FOI_7496

The following information was requested and clarified on 15 October 2025:

[On the 15 October, you requested]

I would like to make a Freedom of Information Act request regarding the number and value of medical negligence claims made against NHS Trusts in the Essex and East Anglia regions.

For the purposes of this request, "Essex and East Anglia" refers to the following NHS trusts (or their predecessors/successors):

- Essex Partnership University NHS Foundation Trust
- Mid and South Essex NHS Foundation Trust
- East Suffolk and North East Essex NHS Foundation Trust
- Norfolk and Suffolk NHS Foundation Trust
- The Princess Alexandra Hospital NHS Trust
- West Suffolk NHS Foundation Trust

I would be grateful if you could provide, for each financial year from 2015/2016 to the most recent available year, the following information relating to medical negligence claims handled by NHS Resolution for NHS trusts and healthcare providers based in Essex and East Anglia:

- Number of new clinical claims received each year.
- Total value of damages paid each year.
- The most common causes or categories of clinical claims (e.g. obstetrics, surgery, emergency medicine) each year.
- A breakdown of the value of different categories of clinical claims (e.g. obstetrics, surgery, emergency medicine) each year.
- A breakdown by NHS trust or healthcare provider, where possible.

If any part of this information is already publicly available, please direct me to the relevant publication or dataset.

If the request is too broad or likely to exceed the cost limit, please let me know so that I can refine or narrow it. Please provide information electronically/digitally in whatever format you deem most suitable.

[We replied on the 15 October with]

Thank you for your email to NHS Resolution. Before we can respond I would like to clarify what information we are able to provide.

Please refer to our publication: [Guidance-note-Understanding-NHS-Resolution-data-updated](#) and a set of codes against which claims are logged: [CNST-Codes.xlsx \(live.com\)](#) (see the three tabs in the spreadsheet).

In terms of breakdown by categories, would you like a breakdown by specialty or by cause or injury?

Also, if we break the information down by each trust and each year, it is likely to result in low numbers of claims, which may need to be withheld on data protection grounds. Would it be alright if we aggregate this data and provide breakdown per trust per 10 years?

You can also find some useful information in our publications: [Annual statistics - NHS Resolution](#).

Please confirm how you would like to break down the information.

Your request will be put on hold until we receive the clarification requested above.

[You replied on the 15 October with]

Thank you for the quick response and supplying the set of codes your claims are logged against.

Having reviewed the codes you provided, would it be possible to receive the breakdown by both cause and specialty?

That is absolutely fine to aggregate the data and provide a breakdown per trust per 10 years. However, is it possible to receive annual figures for the total number of claims received (of any type) and damages paid for the 6 trusts as noted in my original request?

Our Response

Please find attached the requested information.

NB: We have recently changed the way we report on our FOIs to align better with our published documents. Streamlining our reporting on FOIs with our annual published reports may mean a variation in snapshot dates. This means this data may not align with previous similar requests and it may not be possible for you to compare this information with a previous request. For further information, please refer to [Guidance-note-Understanding-NHS-Resolution-data-updated](#)

Claims notified/received in any given year will often relate to incidents that have occurred many years prior. Due to the nature of clinical negligence claims and the level of investigation needed to bring them to a resolution, claims received and notified in a specific year may take years to settle and close. **They are not guaranteed to be settled and closed in the same year.** As such, there will be a time gap between incident and claim closure.

Due to the way in which data is extracted, it is also possible that the same claim may appear more than once in a dataset, across different year groups e.g. where the case

has been closed (as nil damages payment), challenged, reopened, and closed again at conclusion.

The data shows variation in numbers of closed per year and costs attributed to those claims. This is a reflection of the nature of individual claims received and resolved by NHS Resolution, which can vary significantly. As such, these fluctuations cannot be interpreted as trends.

We have provided data on CNST cases only. For further information about our CNST scheme please visit our website [Clinical Negligence Scheme for Trusts - NHS Resolution](#).

Please find attached the following tables:

Table 1 shows: Number of CNST Claims and Incidents received between financial years 2015/16 and 2024/25 for **Essex Partnership University NHS Foundation Trust, Mid and South Essex NHS Foundation Trust, East Suffolk and North Essex Foundation Trust, Norfolk and Suffolk NHS Foundation Trust, The Princess Alexandra Hospital NHS Foundation Trust, and West Suffolk NHS Foundation Trust**. Broken down by **NHS Trust and Year**

Table 2 shows: Number of CNST Claims and Incidents received between financial years 2015/16 and 2024/25 for **Essex Partnership University NHS Foundation Trust, Mid and South Essex NHS Foundation Trust, East Suffolk and North Essex Foundation Trust, Norfolk and Suffolk NHS Foundation Trust, The Princess Alexandra Hospital NHS Foundation Trust, and West Suffolk NHS Foundation Trust**. Broken down by **NHS Trust and Specialty**.

Table 3 shows: Number of CNST Claims and Incidents received between financial years 2015/16 and 2024/25 for **Essex Partnership University NHS Foundation Trust, Mid and South Essex NHS Foundation Trust, East Suffolk and North Essex Foundation Trust, Norfolk and Suffolk NHS Foundation Trust, The Princess Alexandra Hospital NHS Foundation Trust, and West Suffolk NHS Foundation Trust**. Broken down by **NHS Trust and Cause**.

Table 4 shows: Number and Damages Paid for CNST Claims Closed (or settled with a periodical payment order) between financial years 2015/16 and 2024/25 for **Essex Partnership University NHS Foundation Trust, Mid and South Essex NHS Foundation Trust, East Suffolk and North Essex Foundation Trust, Norfolk and Suffolk NHS Foundation Trust, The Princess Alexandra Hospital NHS Foundation Trust, and West Suffolk NHS Foundation Trust**. The data includes the damages paid up until the end of each relevant financial year of closure, or for PPO matters, year of settlement. Broken down by **NHS Trust and Year**.

Table 5 shows: Number and Damages Paid for CNST Claims Closed (or settled with a periodical payment order) between financial years 2015/16 and 2024/25 for **Essex Partnership University NHS Foundation Trust, Mid and South Essex NHS Foundation Trust, East Suffolk and North Essex Foundation Trust, Norfolk and Suffolk NHS Foundation Trust, The Princess Alexandra Hospital NHS Foundation Trust, and West Suffolk NHS Foundation Trust**. The data includes the damages paid up until the end of each relevant financial year of closure, or for PPO matters, year of settlement. Broken down by **NHS Trust** and **Specialty**.

Table 6 shows: Number and Damages Paid for CNST Claims Closed (or settled with a periodical payment order) between financial years 2015/16 and 2024/25 for **Essex Partnership University NHS Foundation Trust, Mid and South Essex NHS Foundation Trust, East Suffolk and North Essex Foundation Trust, Norfolk and Suffolk NHS Foundation Trust, The Princess Alexandra Hospital NHS Foundation Trust, and West Suffolk NHS Foundation Trust**. The data includes the damages paid up until the end of each relevant financial year of closure, or for PPO matters, year of settlement. Broken down by **NHS Trust** and **Cause**.

Please note: the tables broken down by Trusts should not be interpreted as a league table. Larger member organisations and those which provide more complex treatments may receive more claims than smaller organisations or those providing low risk care. Inevitably, different institutions face different levels of risk because of the variations in the nature and complexity of the procedures they perform. In some circumstances, volumes of reported cases may be impacted by multiple claims notified in relation to one cause of action.

PPOs -

The information disclosed includes damages paid up to the end of the settlement year (in Periodical payment order (PPO) cases) and up to the end of the closure year in non-PPO cases.

PPOs are an agreement between the parties, to pay an initial lump sum and regular future payments (PPO damages) related to the injured party's ongoing needs, usually care for life i.e., a percentage of the full value of the claim is paid at the point of settlement (lump sum damages) with the balance paid at regular intervals over subsequent years. The information disclosed includes lump sum damages and any PPO damages paid up to the end of the year of settlement. It does not include PPO damages, which have been committed to but due to be paid after the settlement year.

Low Numbers

Please note we have suppressed low figures (and high figures that would make it possible to work out low numbers) as we believe that disclosure of information with this level of granularity is exempt under Section 40(2) by virtue of section 40(3A) (a) of the Freedom of Information Act 2000, where disclosure to a member of the public would contravene one or more of the data protection principles. The data protection principles are set out in Article 5 of the General Data Protection Regulation. We take the view that

it would not be fair or lawful (given the sensitive and confidential nature of the information held) to disclose such information, and any disclosure would therefore contravene the first data protection principle.

In some instances, the low numbers of claims (fewer than 5) in each category, the likelihood exists that individuals who are the subject of this information may be identified either from this information alone, or in combination with other available information. In addition to this, as this information is considered to be sensitive personal data (the data subjects' medical condition); NHS Resolution believes it has a greater responsibility to protect those individuals' identities, as disclosure could potentially cause damage and/or distress to those involved. Where we are in the territory of such small numbers in the attached, we have used a '#' symbol in the relevant field. You should still be able to see aggregate/total details for higher level fields containing this data.

Please refer to [Understanding NHS Resolution data](#) guidance for further details on how our Claims database is categorised.

Further to our obligations to provide advice and assistance, you may find it helpful to review the work of the [Getting It Right First Time team](#) with whom NHS Resolution has been working with to undertake in-depth analysis of our claims data. They have produced a number of [reports](#) from analysing our claims data which has been shared following approval of the confidentiality advisory group to the use of confidential patient information for this purpose.

If you would like to know how data is categorised in our Claims database please see the following link: [Glossary](#)

This concludes our response to your request.

If you are not satisfied with the service that you have received in response to your information request, it is open to you to make a complaint and request a formal review of our decisions. If you choose to do this, you should write to [Joanne Appleby](#), Deputy Data Protection Officer for NHS Resolution, within 28 days of your receipt of this reply. Reviews of decisions made in relation to information requests are carried out by a person who was not involved in the original decision-making about the request.

If you are not content with the outcome of your complaint, you may apply directly to the Information Commissioner for a review of the decision. Generally, the Information Commissioner will not make a decision unless you have exhausted the local complaints procedure. The address of the Information Commissioner's Office is:

Wycliffe House
Water Lane
Wilmslow
Cheshire
SK9 5AF

Data correct as at: The end of every financial year

Please note: the tables broken down by Trusts should not be interpreted as a league table. Larger member organisations and those which provide more complex treatments may receive more claims than smaller organisations or those providing low risk care. Inevitably, different institutions face different levels of risk because of the variations in the nature and complexity of the procedures they perform. In some circumstances, volumes of reported cases may be impacted by multiple claims notified in relation to one cause of action.

Table 3: Number of CNST Claims and Incidents received between financial years 2015/16 and 2024/25 for Essex Partnership University NHS Foundation Trust, Mid and South Essex NHS Foundation Trust, East Suffolk and North Essex Foundation Trust, Norfolk and Suffolk NHS Foundation Trust, The Princess Alexandra Hospital NHS Foundation Trust, and West Suffolk NHS Foundation Trust. Broken down by NHS Trust and Cause.

Notified

Y

NHS Trust Name	No. of Claims
--- Primary Cause	
Fail / Delay Treatment	39
Inappropriate Treatment	24
Inappropriate Discharge	6
Inadequate Nursing Care	6
Grand Total	4,313

Please note: the tables broken down by Trusts should not be interpreted as a league table. Larger member organisations and those which provide more complex treatments may receive more claims than smaller organisations or those providing low risk care. Inevitably, different institutions face different levels of risk because of the variations in the nature and complexity of the procedures they perform. In some circumstances, volumes of reported cases may be impacted by multiple claims notified in relation to one cause of action.

Table 4: Number and Damages Paid for CNST Claims Closed (or settled with a periodical payment order) between financial years 2015/16 and 2024/25 for Essex Partnership University NHS Foundation Trust, Mid and South Essex NHS Foundation Trust, East Suffolk and North Essex Foundation Trust, Norfolk and Suffolk NHS Foundation Trust, The Princess Alexandra Hospital NHS Foundation Trust, and West Suffolk NHS Foundation Trust. The data includes the damages paid up until the end of each relevant financial year of closure, or for PPO matters, year of settlement. Broken down by NHS Trust and Year.

Please note: the tables broken down by Trusts should not be interpreted as a league table. Larger member organisations and those which provide more complex treatments may receive more claims than smaller organisations or those providing low risk care. Inevitably, different institutions face different levels of risk because of the variations in the nature and complexity of the procedures they perform. In some circumstances, volumes of reported cases may be impacted by multiple claims notified in relation to one cause of action.

Table 6: Number and Damages Paid for CNST Claims Closed (or settled with a periodical payment order) between financial years 2015/16 and 2024/25 for Essex Partnership University NHS Foundation Trust, Mid and South Essex NHS Foundation Trust, East Suffolk and North Essex Foundation Trust, Norfolk and Suffolk NHS Foundation Trust, The Princess Alexandra Hospital NHS Foundation Trust, and West Suffolk NHS Foundation Trust. The data includes the damages paid up until the end of each relevant financial year of closure, or for PPO matters, year of settlement. Broken down by NHS Trust and Cause.
