March 2026
FOI_7739

The following information was requested on 20 February 2026:

Annual statistics published in December 2025 show that there were 460 settled claims in radiology for 2024/25, 448 in 2023/24 and 409 in 2023.

<https://resolution.nhs.uk/resources/annual-statistics/>

Under the FOI Act 2000 I am requesting the following information:

- 1. For each year, can I please have a breakdown of the numbers by trust and integrated board, and the total value (£) of claims linked to each organisation. For example, in 2024/25 there were X settled claims at Leeds Teaching Hospitals Trust, totalling £X. At West Yorkshire ICB there were X settled claims totalling £X.*
- 2. Please also give a break down of the numbers (as outlined above) for ophthalmology*
- 3. Please provide the data in an Excel spreadsheet*

Our Response

Please find attached the requested information. Please note we only hold information for England and not for the rest of the UK.

You have requested a breakdown of **settled** claims (as referred to in the annual statistics publication referenced) broken down by organisation and with values attached. We are only able to provide full values of claims once they have been **closed** on our case management system which can often occur some months after settlement. For that reason, the data provided below relates to **closed** cases, rather than settled cases as requested. The data below cannot, therefore, be compared with that included in our published annual statistics.

NB: We have recently changed the way we report on our FOIs to align better with our published documents. Streamlining our reporting on FOIs with our annual published reports may mean a variation in snapshot dates. This means this data may not align with previous similar requests and it may not be possible for you to compare this information with a previous request. For further information, please refer to [Understanding NHS Resolution data - NHS Resolution](#).

Claims notified/received in any given year will often relate to incidents that have occurred many years prior. Due to the nature of clinical negligence claims and the level of investigation needed to bring them to a resolution, claims received and notified in a specific year may take years to settle and close. **They are not guaranteed to be settled and closed in the same year.** As such, there will be a time gap between incident and claim closure. Not all claims received will result in an award of compensation.

The data shows variation in numbers of cases closed per year and costs attributed to those claims. This is a reflection of the nature of individual claims received and resolved by NHS Resolution, which can vary significantly. As such, these fluctuations cannot be interpreted as trends.

Due to the way in which data is extracted, it is also possible that the same claim may appear more than once in a dataset, across different year groups e.g. where the case has been closed (as nil damages payment), challenged, reopened, and closed again at conclusion.

Please note: Cover under the Clinical Negligence Scheme for Trusts (CNST) has also been available to independent sector providers (ISPs) of NHS care since 1st April 2013, but data relating to these ISPs has not been included in our response, as the request was for a breakdown by Trust. Please visit our website for more information about our [Clinical Schemes for Trusts - NHS Resolution](#). Please note that this may mean that the numbers cannot be directly compared with the Annual Report Statistics you have referred to in your request, which include all clinical claims across all providers.

The data provided covers our Clinical schemes. For information about our Clinical Negligence Schemes, please visit our website here: [Clinical schemes - NHS Resolution](#)

Table 1 shows: - Number and Cost of Clinical Claims Closed (or settled with a periodical payment order) between financial years '**2022/23**' and '**2024/25**' with a damages payment or **NIL** damages paid, where the Specialty is '**Radiology**', broken down by **NHS Trust**. The data includes the damages and legal costs paid up until the end of each relevant financial year of closure, or for PPO matters, year of settlement.

Table 2 shows: - Number and Cost of Clinical Claims Closed (or settled with a periodical payment order) between financial years '**2022/23**' and '**2024/25**' with a damages payment or **NIL** damages paid, where the Specialty is '**Ophthalmology**', broken down by **NHS Trust**. The data includes the damages and legal costs paid up until the end of each relevant financial year of closure, or for PPO matters, year of settlement.

The dataset includes clinical claims resulting in damages payments and claims closed with nil damages, in line with the statistics published, and referred to in your request.

Please note: the tables broken down by Trust should not be interpreted as a league table. Larger member organisations and those which provide more complex treatments may receive more claims than smaller organisations or those providing low risk care. Inevitably, different institutions face different levels of risk because of the variations in the nature and complexity of the procedures they perform. In some circumstances, volumes of reported cases may be impacted by multiple claims notified in relation to one cause of action.

PPOs

The information disclosed includes damages paid up to the end of the settlement year (in Periodical payment order (PPO) cases) and up to the end of the closure year in non-PPO cases.

PPOs are an agreement between the parties, to pay an initial lump sum and regular future payments (PPO damages) related to the injured party's ongoing needs, usually care for life i.e., a percentage of the full value of the claim is paid at the point of settlement (lump sum damages) with the balance paid at regular intervals over subsequent years. The information disclosed includes lump sum damages and any PPO damages paid up to the end of the year of settlement. It does not include PPO damages, which have been committed to but due to be paid after the settlement year.

Low figures

We have not provided the information for low figures involved, as we believe that disclosure of information with this level of granularity is exempt under Section 40(2) by virtue of section 40(3A) (a) of the FOI Act, where disclosure to a member of the public would contravene one or more of the data protection principles. The data protection principles are set out in Article 5 of the General Data Protection Regulation. We take the view that it would not be fair or lawful (given the sensitive and confidential nature of the information held) to disclose such information, and any disclosure would therefore contravene the first data protection principle.

In some instances, the low numbers of claims (fewer than 5) in each category, the likelihood exists that individuals who are the subject of this information may be identified either from this information alone, or in combination with other available information. In addition to this, as this information is considered to be sensitive personal data (the data subjects' medical condition); NHS Resolution believes it has a greater responsibility to protect those individuals' identities, as disclosure could potentially cause damage and/or distress to those involved.

Further to our obligations to provide advice and assistance, you may find it helpful to review the work of the [Getting It Right First Time team](#) with whom NHS Resolution has been working with to undertake in-depth analysis of our claims data. They have produced several [reports](#) from analysing our claims data which has been shared following approval of the confidentiality advisory group to the use of confidential patient information for this purpose.

Please refer to [Understanding NHS Resolution data](#) guidance for further details on how our Claims database is categorised.

This concludes our response to your request.

If you are not satisfied with the service that you have received in response to your information request, it is open to you to make a complaint and request a formal review of our decisions. If you choose to do this, you should write to [Joanne Appleby](#), Deputy Data Protection Officer for NHS Resolution, within 28 days of your receipt of this reply. Reviews of decisions made in relation to information requests are carried out by a person who was not involved in the original decision-making about the request.

If you are not content with the outcome of your complaint, you may apply directly to the Information Commissioner for a review of the decision. Generally, the Information Commissioner will not make a decision unless you have exhausted the local complaints procedure. The address of the Information Commissioner's Office is:

Wycliffe House
Water Lane
Wilmslow
Cheshire
SK9 5AF

TABLE OF CONTENTS

NB: Number of claims fewer than 5 (and any associated values, within the same row) are masked with a "#" (in accordance with Data Protection guidelines). Accordingly, some total values may also be approximated to prevent masked values to be deduced through reverse calculation.

Table 1: Number and Cost of Clinical Claims Closed (or settled with a periodical payment order) between financial years '2022/23' and '2024/25' with a damages payment or NIL damages paid, where the Specialty is 'Radiology', broken down by NHS Trust. The data includes the damages and legal costs paid up until the end of each relevant financial year of closure, or for PPO matters, year of settlement.

Table 2: Number and Cost of Clinical Claims Closed (or settled with a periodical payment order) between financial years '2022/23' and '2024/25' with a damages payment or NIL damages paid, where the Specialty is 'Ophthalmology', broken down by NHS Trust. The data includes the damages and legal costs paid up until the end of each relevant financial year of closure, or for PPO matters, year of settlement.

Please note: the tables broken down by Trusts should not be interpreted as a league table. Larger member organisations and those which provide more complex treatments may receive more claims than smaller organisations or those providing low risk care. Inevitably, different institutions face different levels of risk because of the variations in the nature and complexity of the procedures they perform. In some circumstances, volumes of reported cases may be impacted by multiple claims notified in relation to one cause of action.

Table 1: Number and Cost of Clinical Claims Closed (or settled with a periodical payment order) between financial years '2022/23' and '2024/25' with a damages payment or NIL damages paid, where the Specialty is 'Radiology', broken down by NHS Trust. The data includes the damages and legal costs paid up until the end of each relevant financial year of closure, or for PPO matters, year of settlement.

Please note: the tables broken down by Trusts should not be interpreted as a league table. Larger member organisations and those which provide more complex treatments may receive more claims than smaller organisations or those providing low risk care. Inevitably, different institutions face different levels of risk because of the variations in the nature and complexity of the procedures they perform. In some circumstances, volumes of reported cases may be impacted by multiple claims notified in relation to one cause of action.

Table 2: Number and Cost of Clinical Claims Closed (or settled with a periodical payment order) between financial years '2022/23' and '2024/25' with a damages payment or NIL damages paid, where the Specialty is 'Ophthalmology', broken down by NHS Trust. The data includes the damages and legal costs paid up until the end of each relevant financial year of closure, or for PPO matters, year of settlement.

ClosedSettled	Y
Specialty1L1ARA	Ophthalmology

Closure Year (Settlement Year for PPOs)	No. of Claims	Damages Paid	NHS Legal Costs paid	Claimant Costs Paid	Total Paid
