August 2026
FOI_8021

The following information was requested and clarified on 11 August 2026:

[On the 11 August, you requested]

*I would like to know how many completed cases of clinical negligence or admitted cases had a failing of the Electronic Prescribing and Medicines Administration listed as a cause please.
I would like this data for the last four years please.*

One more thing, could I have that broken down by trust and amount please?

[We responded with]

Thank you for your request to NHS Resolution. Before we can respond, I would like to clarify what information we hold and are able to provide.

Please refer to our publication: [Guidance-note-Understanding-NHS-Resolution-data-updated](#) and a set of codes against which claims are logged: [CNST-Codes.xlsx](#) (see the three tabs in the spreadsheet).

We do not have a specific code for Electronic Prescribing.

We have the following codes related to administering medication:

- Medication errors
- Err with Agnt/Dose/Route/Selec
- Incorrect injection site
- IntravAdminMisselecConcentrPotassChlor
- Wrong route Admin of Chemo
- Infusion Problems
- Fail Mon Dose/rate Syntocinon

Please also review the codes linked above to identify any others that may be relevant to your request, and let us know what information you are interested in.

Please note that at present, we can only provide data up to and including 2024/25. Data for 2025/26 will be available upon request from September 2026

[You replied with]

Thanks for this, it has helped me refine what I am after.

I would like to see a breakdown of all the "medication errors" (68 on the spreadhseet) for the last four years please.

This should only be for hospital trusts pls.

I would like to see this broken down by successful and unsuccessful claims, or ones that have simply been logged but not determined yet.

I am also interested to know the numbers for "medication errrs" that fall under the "non-clinical claim" category, this should also be broken down by trust pls.

Our Response

Please find attached the information we are able to provide. This information only covers England and not the rest of the UK. The dataset presented in the response below cover:

- In respect of table 1, Medication Errors CNST claims and incidents notified to NHS Resolution between 2021/22 - 2024/25.
- In respect of table 2 Medication Errors CNST claims closed (or settled as a PPO) between 2021/22 - 2024/25.
- In respect of table 3 Medication Errors CNST claims closed with NIL damages between 2021/22 - 2024/25.

Please note that claims data for 2025/26 financial year will be available upon request from September 2026.

NB: We have recently changed the way we report on our FOIs to align better with our published documents. Streamlining our reporting on FOIs with our annual published reports may mean a variation in snapshot dates. This means this data may not align with previous similar requests and it may not be possible for you to compare this information with a previous request. For further information, please refer to [Guidance-note-Understanding-NHS-Resolution-data-updated](#)

Claims notified/received in any given year will often relate to incidents that have occurred many years prior. Due to the nature of clinical negligence claims and the level of investigation needed to bring them to a resolution, claims received and notified in a specific year may take years to settle and close. **They are not guaranteed to be settled and closed in the same year.** As such, there will be a time gap between incident and claim closure. Not all claims received will result in an award of compensation.

The data shows variation in numbers of claims received, closed per year and costs attributed to those claims. This is a reflection of the nature of individual claims received and resolved by NHS Resolution, which can vary significantly. As such, these fluctuations cannot be interpreted as trends.

Due to the way in which data is extracted, it is also possible that the same claim may appear more than once in a dataset, across different year groups e.g. where the case has been closed (as nil damages payment), challenged, reopened, and closed again at conclusion.

The data provided covers our Clinical Negligence Scheme for Trusts (CNST). For further information about the CNST, please visit our website here: [Clinical Negligence Scheme for Trusts - NHS Resolution](#). Please note: cover under the CNST has also been available to independent sector providers (ISPs) of NHS care since 1st April 2013, but data relating to these ISPs has not been included in our response, as the request was in relation to NHS Trusts.

Please find attached the following tables:

Table 1 shows: Number of CNST Claims and Incidents received between financial years '2021/22' and '2024/25' where the Primary Cause is '**Medication Errors**'. Broken down by **NHS Trust**.

Table 2 shows: Number and Cost of CNST Claims Closed (or settled with a periodical payment order) between financial years '2021/22' and '2024/25' with a damages payment, where the Primary Cause is '**Medication Errors**'. The data includes the damages and legal costs paid up until the end of each relevant financial year of closure, or for PPO matters, year of settlement. Broken down by **NHS Trust**.

Table 3 shows: Number and Cost of CNST Claims Closed between financial years '2021/22' and '2024/25' with NIL damages paid where the Primary Cause is '**Medication Errors**'. Broken down by **NHS Trust**.

Please note: the tables broken down by Trust should not be interpreted as a league table. Larger member organisations and those which provide more complex treatments may receive more claims than smaller organisations or those providing low risk care. Inevitably, different institutions face different levels of risk because of the variations in the nature and complexity of the procedures they perform. In some circumstances, volumes of reported cases may be impacted by multiple claims notified in relation to one cause of action.

PPOs -

The information disclosed includes damages and costs paid up to the end of the settlement year (in Periodical payment order (PPO) cases) and up to the end of the closure year in non-PPO cases.

PPOs are an agreement between the parties, to pay an initial lump sum and regular future payments (PPO damages) related to the injured party's ongoing needs, usually care for life i.e., a percentage of the full value of the claim is paid at the point of settlement (lump sum damages) with the balance paid at regular intervals over

subsequent years. The information disclosed includes lump sum damages, costs and any PPO damages paid up to the end of the year of settlement. It does not include PPO damages, which have been committed to but due to be paid after the settlement year.

Low figures

We have not provided the information for low figures involved, as we believe that disclosure of information with this level of granularity is exempt under Section 40(2) by virtue of section 40(3A) (a) of the FOI Act, where disclosure to a member of the public would contravene one or more of the data protection principles. The data protection principles are set out in Article 5 of the General Data Protection Regulation. We take the view that it would not be fair or lawful (given the sensitive and confidential nature of the information held) to disclose such information, and any disclosure would therefore contravene the first data protection principle.

In some instances, the low numbers of claims (fewer than 5) in each category, the likelihood exists that individuals who are the subject of this information may be identified either from this information alone, or in combination with other available information. In addition to this, as this information is considered to be sensitive personal data (the data subjects' medical condition); NHS Resolution believes it has a greater responsibility to protect those individuals' identities, as disclosure could potentially cause damage and/or distress to those involved.

In relation to your request on medication errors that fall under the non-clinical claims category. "Medication errors" is purely a clinical cause code within our claims data and is not relevant to non-clinical claims.

As advice and assistance, you may find [NHS Resolution's medication error](#) learning series helpful. The series explores learning identified from medication error claims.

Further to our obligations to provide advice and assistance, you may find it helpful to review the work of the [Getting It Right First Time team](#) with whom NHS Resolution has been working with to undertake in-depth analysis of our claims data. They have produced a number of [reports](#) from analysing our claims data which has been shared following approval of the confidentiality advisory group to the use of confidential patient information for this purpose.

Please refer to [Understanding NHS Resolution data](#) guidance for further details on how our Claims database is categorised.

This concludes our response to your request.

If you are not satisfied with the service that you have received in response to your information request, it is open to you to make a complaint and request a formal review of our decisions. If you choose to do this, you should write to [Joanne Appleby](#), Deputy Data Protection Officer for NHS Resolution, within 28 days of your receipt of this reply.

Reviews of decisions made in relation to information requests are carried out by a person who was not involved in the original decision-making about the request.

If you are not content with the outcome of your complaint, you may apply directly to the Information Commissioner for a review of the decision. Generally, the Information Commissioner will not make a decision unless you have exhausted the local complaints procedure. The address of the Information Commissioner's Office is:

Wycliffe House
Water Lane
Wilmslow
Cheshire
SK9 5AF

Please note: the tables broken down by Trusts should not be interpreted as a league table. Larger member organisations and those which provide more complex treatments may receive more claims than smaller organisations or those providing low risk care. Inevitably, different institutions face different levels of risk because of the variations in the nature and complexity of the procedures they perform. In some circumstances, volumes of reported cases may be impacted by multiple claims notified in relation to one cause of action.

Table 2: Number and Cost of CNST Claims Closed (or settled with a periodical payment order) between financial years '2021/22' and '2024/25' with a damages payment, where the Primary Cause is 'Medication Errors'. The data includes the damages and legal costs paid up until the end of each relevant financial year of closure, or for PPO matters, year of settlement. Broken down by NHS Trust.
