Telephone: 020 7811 2700

February 2019
FOI_3620

The following information was requested on 21 January 2019:

I am just getting in touch as I was asked to put in an FOI to trusts and health boards to find out what claims NHS staff have made for various workplace injuries/other reasons.

We ran an article about this last year and my colleague Flavia Munn wrote the piece.

<https://rcni.com/nursing-standard/newsroom/analysis/workplace-safety-remains-concern-staff-injury-bill-tops-%C2%A347-million-73961>

I have only recently sent the request but have already received a few responses detailing this information requested.

However, I have also had some responses like the one below, which suggests that NHS Resolution publishes this data. I just wondered if you could help us to establish whether you breakdown the data for trusts, or if not, what you may be able to tell us?

Our Response

By way of advice and assistance, we do publish general information about Trusts' claims experience annually. This includes general data about 'LTPS' scheme claims, which includes (but is not limited to) employers' liability issues (i.e. claims by staff). You can download the most recent factsheet here:

<https://resolution.nhs.uk/resources/factsheet-5-trust-and-authority-claims-data-2017-18/>

However, this does not include a breakdown specific claims by staff. Therefore, by reference to the specific information you have asked about, please find attached the information we are able to provide.

We have suppressed low figures as we believe that disclosure of information with this level of granularity is exempt under Section 40(2) by virtue of section 40(3)(a)(i) of the Act, where disclosure to a member of the public would contravene one or more of the data protection principles. The data protection principles are set out in Article 5 of the General Data Protection Regulation. We take the view that it would not be fair or lawful (given the sensitive and confidential nature of the information held) to disclose such information, and any disclosure would therefore contravene the first data protection principle.

In some instances the low numbers of claims (fewer than 5) in each category, the likelihood exists that individuals who are the subject of this information may be identified either from this information alone, or in combination with other available information. In addition to this, as this information is considered to be sensitive personal data (the data subjects' medical condition); NHS Resolution believes it has a greater responsibility to protect those individuals identities', as disclosure could potentially cause damage and/or distress to those involved. Where we are in the territory of such small numbers in the attached, we have used a '#' symbol in the relevant field. You should still be able to see aggregate/total details for higher level fields containing this data.

If you would like to know how data is categorised in our Claims database please see the following link: [Glossary](#)

This concludes our response to your request.

If you are not satisfied with the service that you have received in response to your information request, it is open to you to make a complaint and request a formal review of our decisions. If you choose to do this, you should write to [Tinku Mitra](#), Head of Corporate and Information Governance for NHS Resolution, within 28 days of your receipt of this reply. Reviews of decisions made in relation to information requests are carried out by a person who was not involved in the original decision-making about the request.

If you are not content with the outcome of your complaint, you may apply directly to the Information Commissioner for a review of the decision. Generally, the Information Commissioner will not make a decision unless you have exhausted the local complaints procedure. The address of the Information Commissioner's Office is:

Wycliffe House
Water Lane
Wilmslow
Cheshire
SK9 5AF

TABLE OF CONTENTS

NB: Number of claims fewer than 5 (and any associated values, within the same row) are masked with a "#" (in accordance with Data Protection guidelines). Accordingly, some total values may also be approximated to prevent masked values to be deduced through reverse calculation.
